Dear Parents,

Our schools, SS. Peter and Paul Nursery & Primary School and St. John Nursery & Primary School, were established more than 10 years ago, even if we dedicated great efforts to the youth education in Nigeria for the last 30 years ago.

We are guided by our passion to educate the younger generations and to provide affordable educational opportunities for our students. We work effortlessly to help them nurture their academic talents and personal awareness.

The hinge pin of our educational proposal is the relationship between the educator and the student. Only a human being can affirm the meaning of any given reality, hence it is through this relation that the child is introduced to the world. Our schools’ programmes support the growth and discovery process of each student through a multi-disciplinary approach: literature, science, art, reading, mathematics, sport activities and excursions.

All our educational activities are taught in ways which our children to experience themselves and the reality around them. The daily accurate and patient didactic work of our teachers is focused on fostering each student’s talents, according to their uniqueness. We bet on their own capabilities, stimulating their curiosity and resourcefulness.

Our teachers are invited to learn continuously (to sharpen their professionalism so as to accompany our students adequately in the unceasing process of learning.)

Loving Gaze aims at offering our children’s families an accessible and concrete help in achieving the great task which goes with education: we believe that education is really about forming a truly mature and rounded human person, living in communion with others. We support their families’ efforts towards education and accompany our pupils to assume responsibility for shaping their destiny in freedom and personal integrity.

Barbara Pepoli
Loving Gaze General Manager

With care we succeed!
This year, Primary 6 classes read and worked on Carlo Collodi’s “The Adventures of Pinocchio”, Italy’s most famous fairy tale, first published in 1883. It narrates the story of a wooden puppet “Pinocchio” who becomes a boy. Even before being carved out of a piece of wood Pinocchio already has a naughty attitude and soon runs out of home starting a long picaresque series of adventures.

The story is settled in a poor Italian village, two centuries ago, but it still talks to millions of children around the world about the journey from childhood to adulthood; about responsibility, truthfulness and love.

Pinocchio might have been disobedient, and have broken his father’s heart, but who couldn’t help caring for the little puppet who more than anything, just wanted to be a real boy? He is sometimes mischievous, but he has a good heart and a big desire...to become human and being loved as a human. He fails, learns and tries again and again. Our children really enjoyed Pinocchio’s adventures, worked hard, and achieved a terrific success bringing his stories to the stage.

Ms Paola Freddi
SS Peter & Paul School Teacher
We are born to read!

This year our children at SS Peter & Paul School were engaged with four different readings, (based on their age and interests):

"The Bottle Neck" by Christian Andersen ....

"The Brave Little Tailor", by Brothers Grimm...

"The Flax" by Christian Andersen ....

"The Happy Prince" by Oscar Wilde ....

The reading done in each class stimulated the curiosity and attention of the pupils, greatly. To this, they worked on the various stories they read by writing their own impressions, analysing the plot, the vocabulary and the main characters, and as well as expressing themselves through their drawings.
I feel sad for the bottle neck; how will you feel if you are left with no body only your neck? What will you do? I also feel that the bottle neck has suffered when he fell into the sea and went on so many adventures, the bottle neck is a humble bottle, he is contented with what he has.

Oreoluwa Ifeola
Pry 5B

The best part I liked about the bottle neck was when the Aeronaut threw the bottle neck high in the air because of the way it was spinning in the air and how it ended up being a bottle neck. It had a lot of adventures and went to a lot of places and was used for a lot of things. I actually think I will be able to do things and have a lot of adventures too. The bottle neck is a very interesting story.

Anonyai Nicholas
Pry 5A
The toad is an animal that has a long tongue with which it catches insects to eat, just as I eat food by using the spoon to put the food into my mouth. So the toad’s tongue is like my spoon that I use to put food in my mouth. I also learnt that it is good to listen to whatever my parent or elders tell me because this is for my safety and good health.

Oyewole Kamorudeen
Primary 3

What I learnt in the story “The Happy Prince” is no matter how happy we are, we should remember the poor people and those who are suffering and we should try to help them so that they too will be happy.

Adebayo Semilore
Primary 4

The prince was a very nice person. He was so kind and honest. He was a very happy prince. He was so kind that he gave one person his eye. He was honest and was never sad. He made some people realize that they should not be sad. The statue of the happy prince reminded the people that he was friendly. The people loved the happy prince because he was respectful so all the people liked him. His eyes were made of two bright sapphires. I like the prince because he is kind, honest and respectful and what I learnt from him is to be honest, respectful, kind and helpful.

Odunayo Quanitat
Primary 4

There is a part of the flax flower story I did not like. The flax grew long and looking beautiful and he was very happy because he was growing fine. But then people came to pull the flax from its root and this was really painful to the flax. I did not like when the flax was sad and this taught me that, in life there must be a time when one can be happy and a time when one can be sad.

Ejembi Veronica
Primary 2

What I learnt from the story is about the little boy who was so kind to the giant when the giant carried him to the tree and he kissed the giant, then the giant realized that it was because of chasing away the children that the winter kept coming. The giant then allowed them to play in the garden. I would have liked the story to end in a way that the giant should not die.

Agege Idowu Ezra
Primary 5
Our new school library is the favorite spot for many of our students!

We are all really excited about the new library and internet high speed link donated to the school by Vodacom. The library is now a child-friendly area, with colourful bookshelves and reading tables, LCD Television and a wide range of books for all our students from nursery 1 to primary 6.

My school library is a wonderful place to be. It’s lovely and has a lot of story books. There is a particular book I always read and the title is Ulysses. It is a very interesting story and we even acted it as a drama. When we go there it just seems as if we should not come outside because of the story books we read.

Victoria Eyoma
Pry 4A

My school library is a great place to learn. The first time I came to the library I was excited because the library is so colorful and there are a lot of story books. I enjoy staying in the library because when you come inside the library it would be so quiet and the books will be kept orderly.

Amaji Osita
Pry 5A
Music is an expression of feelings, it expresses culture through dressing, dancing instruments and types of music. It plays an important role in facilitating and extending the understanding and appreciation of other people’s culture. This is why we encourage our students to attend the music classes and learn how to play an instrument of their choice. It is a personal enrichment for them. It helps them become good listeners and allow them to express their feelings and talents.
Drum rolls for the Schools’ Sport Day 2017!

SS. Peter & Paul and St John Schools

Our teachers mixed aged teams across the whole primary school with Year 6 acting as ‘team leaders’. The activities were multi-skill based and we picked games that build on fundamental movement skills: races, football, volleyball and athletics.
Decked in their colourful beads, beautiful earrings and trendy traditional attire, the pupils expressed themselves in dance, songs and play. The parents, teachers and pupils enjoyed a joyful and reach day sharing each other’s traditions.
Every year Christmas is celebrated in both our schools with the Nativity play and a colorful party which marks the end of the year and the festive season. This year, thanks to Vodacom each and every pupil received also a water bottle and a backpack!
Welcome mums and dads!

Every year we welcome all families to spend a day with us at SS. Peter & Paul School for the “Open Day”. We are grateful for the time they share with us to review their children’s academic progress, to visit our pupils’ art exhibition, and chat with SS Peter & Paul School’s senior staff.
The introduction of Catechism in SS. Peter and Paul Nursery & Primary School started in September 2016, and has brought a great impact on our pupils. The purpose is to provide the foundation for understanding of the Catholic belief. This has helped them to appreciate the basic prayers and doctrines of the Catholic Church and has enlightened them more about their faith. On the 16th of April, 2017, four pupils received the Sacrament of Baptism while eight pupils received the Sacrament of Holy Communion.
On a trip to learn!

The purpose of our excursion is essentially to give the students the chance to experience new environments, visit new sites and discover more about the reality which surrounds them. It is also a fun bonding experience with their classmates, and creates the opportunity for them to enjoy a day away from the classroom.

We went to Laminade Tissue processing company and we saw the machines making tissue, spoons, straws and servette. They also allowed us to seal, to cut the spoon and to pack the straws. They make their straws in different colors like pink, white, blue, purple...

Ukome, Primary 4

What caught my interest is the CCTV everywhere in the mall, and there was tight security. And everything you buy you must collect receipt even to things of #20.

Joseph Sylvester
Primary 5

We visited the Palace of the Oba of Igbogbo. We greeted the Oba and sang and praised (Orikiki) and he smiled at us and rose up his horsetail at us and answered our questions. He told us to be good children and face our studies so that we can succeed in life.

Akinbolaji Michael
Primary 3

The king told us his plan for the people of Igbogbo town and how he intends to ensure safety to all the people in the community. I noticed that something was missing: his crown and his throne! One of the chiefs explained to us that the king did not wear his crown and he did not seat on his throne because it was not an official ceremony. But he was holding his stuff, which is called (Copa ase). He also appreciated our gift and also gave us some packages too. It was a wonderful day for me: I had the chance to see a real life king!

Oguntoginbo Mercy
Primary 3

I was very excited when I saw Baba Ajasco, we hugged each other, he carried me on his shoulder, I was very happy. It was amazing and fun to visit National Theatre. I really enjoyed myself with my friends.

Chinwendu Mmesomma
Pry 2B
I learnt how to do shopping and I know more about addition and subtraction of money. In future I wish to be a trader and to build a shopping mall for people.

Ayidabla Prosper
Primary 3

At the National Museum there were scary statues, I felt so scared looking at the statues, I never thought anyone could carve a human being or even a pot. We never knew that we could discover so much about masquerades, the instruments of a king and knowledge about the old days. My real experience was seeing that the car General Muritala Mohammed was killed in is still there ever since he died. I had fun.

Michael Francisca
Pry 3A

The experience I had during the excursion to PZ Cussons company was wonderful. When we entered, a lady called Mrs. Tinu told us about the company and its products: Nunu powdered and evaporated milk, coast milk in powdered form and Olympic yoghurt drink. Then she told us about some sections in the factory, starting with the section in which you have washing basins that will wash your hand completely clean. She also explained to us why our hands need to be cleaned before entering the factory. The main reason is that the product there is for human consumption and we must also cover our heads with some special cloths so that none of our hair would get into the products. Our head teacher looked very funny in a pair of boot that was given to her by the security men. Then we entered a room that was very cold and we were showed the milk processing by the technical engineer. We enjoyed the visit very much. I enjoyed the visit to PZ because I learnt many new things and the visit was a big fun for me.

Akano Jesuloba
Primary 6

Saipem Contracting Company Ltd is an engineering company; their work is to drill oil from the earth crust, they then take it to the refinery for refining. They explained to us that the secret to engineering is knowing and studying mathematics. From the excursion I learnt so many things! For example, I discovered that crude oil is lighter than water and that is why it floats on water and also how platforms are built on water. One of the staff told us that from ages 9-12 is a time when you need to learn new things because that is a formatting time during our lifetime, and that has made me study harder to learn new things. Indeed, the class excursion was very fascinating. We were addressed as “friends” and not as children.

Give Kids a Smile!

The importance of dental hygiene and oral health routing is underestimated; too often we see our schools’ children and St Kizito Clinics’ young patients suffering because of lack of dental care. For this reason this year, for the first time, we launched the “Give kids a Smile” initiative aimed at promoting dental hygiene among our students. Dr Alessandra Del Governatore, an Italian Dentist with over 20 years of experience, visited St Kizito Clinic as volunteer, and helped us to run the program.

I felt scared when I heard that there would be the dental talk because I thought the dentist was going to remove my teeth. But my teeth were examined and the dentist found nothing wrong with them. They also taught us how to scrub the tongue.

Elumah Frederick
Pry 4B

My own teeth was certified okay and the dentist said bravo! When she checked my teeth.

Olawoyin Michael
Pry 5

The first thing I learnt is that there is a special way to brush my teeth. Before the dental health programme, when I brushed my teeth there would be a lot of blood and it would be paining me. Since I was taught a new way of brushing my teeth and I have been practicing it, it is much better: there is no more blood coming out and no pain. I also learnt that there is an active ingredient in the toothpaste, which is called fluoride, and it prevents the tooth from decaying.

Akano Jesuloba
Pry 6
Students' Excellence

We are extremely proud of the 35 students who attended the high school scholarships examinations this year. For the first time we also had four students of St John School participating to the exams and we are all excited about the results they scored and their commitment.

The selected high schools were:

- Daywaterman College
- Lagoon School
- White Sand School
- Holy Ghost Model College
- Good Shepard College
- Jesilo School

My one year adventure at the Lagoon Secondary School has been fun, but also full of challenges which are mainly academic. I was introduced to many more subjects than I ever did in Saints Peter and Paul School. We offer sixteen (16) subjects each. If you score less than fifty five percent (55%) in Math and English, you will not be promoted to the next class. With this in mind, there is a continuous struggle to do very well in all the subjects.

Onoshioriame Gabriella Williams

Before the day of the exam came I was nervous about it. It felt like I was going to fail the exam. I was hot my heart was beating fast. Any time my mother said anything about it I would be afraid felling sad. She would always say that I will pass the exam and I would say “yes I will pass” but still sad I never knew that I will pass.

When I reached SS Peter and Paul with my colleagues I got even more nervous, but then I calmed myself with a smile. When we were given our script, the questions were easy. Then I did them quickly. We were given mathematics, Quantitative/ Verbal reasoning.

Amadi Emmanuel
St John School, Primary 5

We also congratulate Chimazu, a former SS Peter & Paul School student, who won a Scholarship at Day Waterman College in 2016. He is now completing his first year with excellent results. We praise Daywaterman College generosity offering brilliant students the opportunity to continue their education.

It has been a great experience finding myself in Daywaterman College. There have been challenges trying to cope with new people and that is one of the challenges that most students face. Our academics is sound as we have good teachers. In the last IGSCE our school produced the two best students in the world in two subjects, History and Biology. In conclusion I had both positive and negative experience and learnt that as a student I should take up all challenges, face them and let them make me a better person in life.

Eze Chimazuru
Welcome President Boldrini!

Loving Gaze welcomed the Italian President of the Chamber of Deputies, Hon. Laura Boldrini, on an official visit to Nigeria, to St Kizito Clinic & SS Peter & Paul Nursery & Primary School in Lekki, Lagos. She was accompanied by the Ambassador of Italy in Abuja, H.E. Flavio Rustico and the Consul General of Italy in Lagos, H.E. Andrea Pompermaier. The event was broadcasted live on Facebook, you may watch it online on www.facebook.com/lovingaze and it was widely reported by the Nigerian an Italian press. Hon Boldrini was impressed by our effort upholding the education of the youth and addressed the children.

We welcomed Ms Boldrini along the school’s pathway with the Italian and Nigerians flags. We were all very excited. She talked to us about the need for education especially for the Girl Child. We presented a traditional dance and she was happy and clapped her hands, then she thanked the teachers very much, and waved good bye to us. Her visit was nice and I wish she could come again and spend time with us again.

Joseph Blessing
Pry 3A

President Boldrini said that being a girl is not a disadvantage, that we have equal opportunities as boys. If we are determined we can go places in life just like her.
